OmniForm® PREMIUM 5.0

Quickly and Accurately Make Your Paper Forms Digital!

Easily create, convert and share digital forms! The days of creating and distributing paper forms—and then rekeying the data into a database—are over! OmniForm® significantly reduces the time and expense associated with creating forms and collecting form data. It streamlines the process of designing, editing, managing, and distributing forms, while making it simple for companies to collect data from employees, vendors, customers, and prospects. It also simplifies the process of filling in forms—automatically filling in data that has been provided previously, thereby saving time and reducing keystrokes.

OmniForm enables you to:

- Automatically convert paper forms into digital forms easily and accurately.
- Post your HTML forms on your Web site or with our eOmniForm.com™ service for worldwide data collection.
- Create forms from scratch using pre-designed templates.
- Fill in forms automatically using OmniForm Filler/Data Manager™. It uses previously entered information for faster input.
- Create “intelligent” PDF forms you can distribute to anyone via e-mail.
- Instantly add attachments, such as receipts, to your digital forms.
- Add legally binding digital signatures to forms.

Accurate Editable Forms

Our latest Logical Form Recognition™ (LFR) technology guarantees accurate conversion of your paper forms into digital forms; recognizing color, logos, lines, boxes, and tables. It's fast and easy with the OmniForm user interface.

1 Design A Form

OmniForm is a form designer tool! It includes easy-to-use tools to create forms from scratch. Determine the size, position, and color of every element. Add a new field, logo or edit text. Reorganize entire sections. Use the Designer Toolkit to add and reuse form components or use the pre-designed templates to create a new form.

2 Fill in Forms Faster and Easier

Our Filler/Data Manager lets you fill forms fast and accurately. It will use data from previous forms as you type, reducing valuable input time.

3 Automatic Web Posting

Save forms in HTML and post to your Web site for data collection. Or with our SSL-based eOmniForm.com service, you can post your forms and collect data without any programming or HTML experience.

4 Automatic Database Support

With our Filler/Data Manager utility, a database is automatically created with each form. You can populate the database and perform all your inquiries fast and easily. You can also import or export the form data with any ODBC-compliant database such as Microsoft® Access and other popular databases*.

5 Digital Signatures

Make your forms more secure – forms can be legally signed by you or others with the digital signature feature. For a higher level of security, assign a password to the form.

6 Check Boxes, Radio Buttons and Form Fields

Form elements like check boxes, radio buttons and data entry fields are accurately recognized; eliminating the need to start from scratch.

7 Automatic Calculations

As you type in figures, calculations are performed automatically, reducing errors and saving time.

8 Proofreader

Step-by-step guidance in creating, editing, and spell checking a form.

*ODBC-Compliant Databases:

- Microsoft Access
- Paradox
- Microsoft SQL Server
- dBASE
- DB2 (IBM)
- Text-based and CSV files
- Excel
- Oracle
- FoxPro
- Sybase

Top 10 Reasons to Buy

1 Quickly Turn Paper Forms into Digital Forms

OmniForm makes it possible to quickly and accurately scan in forms such as applications, insurance forms, surveys, purchase orders, etc. and instantly convert them to digital forms.

2 Create Forms from Scratch

Create your own forms with the help of the Designer Toolkit or use the pre-designed templates included. Save your work for future use. Save parts of your form and reuse them with a simple drag and drop.

3 Automatic Data Collection

Automatic database support saves copies of the forms you fill, as well as the export profiles you define to ODBC-compliant databases* like Microsoft® Access and Excel, saving you time and ensuring accuracy.

4 Digital Signatures

Now your electronic signature is as legally binding as pen & ink! Sign forms while ensuring form and data integrity. Users with PKI or Entrust authentication can lock the form when signed, or use OmniForm's built-in password protection.

5 Create PDF Forms

Save your forms as intelligent PDF forms with calculations, field validations and signature fields. OmniForm automatically creates the JavaScript to perform these functions without programming knowledge.

6 Format Versatility

OmniForm gives you the freedom to save forms in the format you want, including HTML, RTF (MS Word) and our intelligent OFM format.

7 Fill Forms Faster

With OFM, previously entered data about you, your business and others is automatically recalled and filled on new forms, saving you valuable time.

8 Add Attachments

Now add attachments such as digital photos, scanned images and computer files to any form record. Attach receipts to expense reports and photos to real estate listings.

9 Post Your Forms on the Web

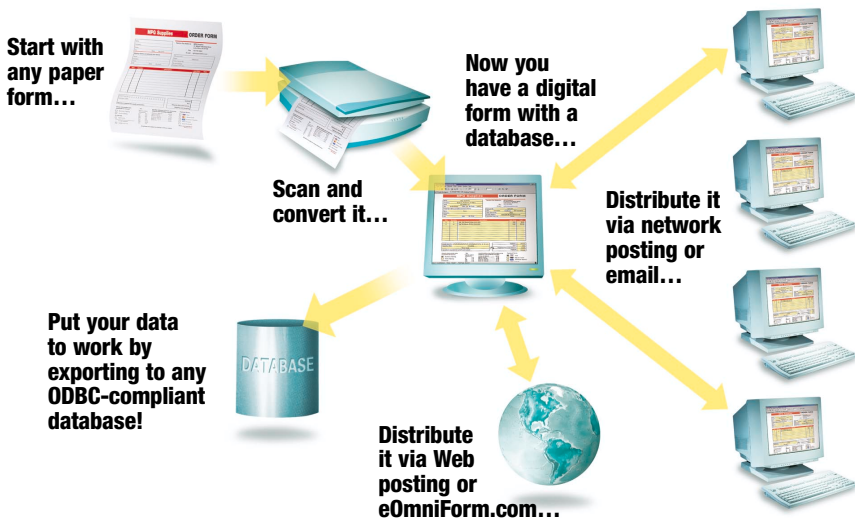

Automatically convert your forms to HTML and post them on your own Web site or with our eOmniForm service. Plus, you can easily collect form data and download it with just a click from any Web connection. www.eomniForm.com

10 Keep Your Forms Secure

SSL-based, industry-standard data transmission encryption ensures high-level data security and privacy.

Increase Productivity and Performance in Your Organization

OmniForm Premium 5.0 is a fully integrated, total forms system designed to significantly reduce the time and expense associated with creating forms, filling out forms and collecting form data. It empowers any company or organization to simplify their working processes with digital forms, whether converted from paper or designed using the Designer Toolkit. These forms can be stored on PCs, network servers or posted on the Web – all instantly accessible to those needing to fill them out or those wishing to process the highly accurate form data. This means dramatic cost reductions associated with third party designers, physical storage, discarding obsolete forms, distribution, and the manpower required for the manual data process.

A Comprehensive Product that Affords Organization-wide Benefits

Form Designers	Form Originators	Form Recipients	Data Processors
<ul style="list-style-type: none"> Quickly and accurately convert paper forms into digital forms Create new forms from scratch fast using the Designer Toolkit and pre-designed templates Enhance forms with intelligence without the need of programming experience 	<ul style="list-style-type: none"> Distribute forms via email in popular e-form formats including OFM, RTF, HTML, DHTML, Fillable PDF, and OmniForm Mailable Filler Post forms on your Web site or eOmniForm.com, ScanSoft's SSL-based Internet forms hosting service 	<ul style="list-style-type: none"> Fill forms up to 50% faster by automatically using previously entered data in your User Profile Use digital signatures with PKI or Entrust authentication Attach photos, receipts, or other supporting data as part of the form record 	<ul style="list-style-type: none"> Receive forms with data that is accurate and instantly ready to evaluate and work with Export form data to any ODBC-compliant database for fast and streamlined data processing – no manual data entry or costly typing errors

OmniForm Premium 5.0 is the Fastest Way to Make Paper Forms Digital and Streamline Form Data Management
